

33 trees planted with charity Trees for Life

In the summer of 2007 we launched our tree planting scheme as corporate supporters of the Trees for Life charity, which restores the Caledonian Forests of Scotland. During that initial 6 month period we sent out our 'little green book of samples' containing pages of different grades and weights of recycled and FSC paper stocks.

A lot of our customers commented on the usefulness of the book, and kept it to refer to when placing their print orders with us. The result being that in that initial introductory period, we planted 33 trees in the forest! We were so encouraged by this that we've decided to keep the 'offer' open indefinitely and we will acknowledge our 'highest planting' customers in our newsletters and send them a certificate to thank them for their valuable contribution to our grove and the forest!

Find out more about the charity and visit our 'grove' on the Trees for Life website at:
www.treesforlife.org.uk/groves/beacon.html

We're also planning to update our book of samples to provide you with an even wider choice of recycled and FSC stocks to choose from. Meanwhile please keep up the good work!

Drop us a line to see how easy it is to make your next project greener.
